

# AtlasGuard × SurveyMonkey

Machine Learning Engineer - Italy / Remote

## Why this project is relevant

- Model-agnostic inference telemetry.
- PSI compares a reference distribution with a rolling window.
- Drift is exported beside latency/system metrics.
- Raw prompts and user text are not stored.

## What I would extend next

1. per-feature/model baselines
2. online evaluation hooks
3. durable storage
4. OpenTelemetry/Kubernetes
5. SLO/load tests

## Honest scope

Demonstrates monitoring mechanics; does not claim AWS/Kafka/EKS/SageMaker production tenure.
